Oralsed[®]

with Uncaria Tomentosa

**NATURAL MOUTHWASH
AND ORAL SPRAY**

#SmilefromNature

OralSed®

with Uncaria Tomentosa

UNCARIA TOMENTOSA is a widespread plant throughout Central and South America that's capable of boosting your immune cells' effectiveness against viral and bacterial infections.

The phytocomplex contains active ingredients with anti-inflammatory properties, which make the mouthwash an effective remedy for pain and inflammation.

Unlike the current gold standard for the treatment of gum inflammation (chlorhexidine), OralSed® doesn't stain the tooth enamel.

MOUTHWASH

- Natural
- Anti-inflammatory
- Anti-bacterial
- Anti-septic
- It doesn't stain teeth
- Without chlorhexidine

- It refreshes your breath
- Excellent in case of dental implants
- It prevents and treats your gums and mouth
- Also suitable for children

Oral Spray - GREEN

NATURAL treatment for mouth and throat inflammations.

Thanks to its adjustable spray dispenser, it can be used directly on the lesion. Indications: canker sores, herpes, small mouth lesions, it treats and prevents acute gingivitis and periodontitis.
